## DF06 Non-Organic Manure or Slurry Derogation

**\*Reason for use:**

Application for approval to use non-organic manure or slurry

**\*Conditions:**

- Derogation approval must be gained from QWFC prior to the application of non-organic manure or slurry;
- The animals that produced the manure or slurry must be fed on non-GM feeds, which includes oils within the ration;
- A copy of the labels for any compound or blend feeds, or GM declarations for straight feeds, fed to the livestock that produced the manure or slurry must be attached to this form;

**QWFC may request further information before a decision can be made.**

What is to be brought-in?	MANURE	SLURRY		
What livestock species produced the manure/slurry?				
What quantity will be brought-in?				
If manure, will it be properly composted prior to application?	YES	NO	NA	
If slurry, will it be subject to controlled fermentation and/or appropriate dilution prior to application?	YES	NO	NA	
In addition to the manure/slurry already produced on farm, will the import of additional material make the application of Nitrogen per hectare exceed 170kg across the registered unit?	YES	NO		
Will the application rate exceed the equivalent of 250kg Nitrogen on any one hectare?	YES	NO		
If the manure/slurry is from mammals, are they given access to pasture during the summer?	YES	NO	NA	
If the manure is from poultry are they in a deep litter system not exceeding 30kg liveweight m <sup>2</sup> or free-range?	YES	NO	NA	
Were the animals/poultry that produced the manure/slurry fed a compound or blended feed?	YES	NO	NA	
If yes to the above is a copy of the feed label(s) attached to this form to prove it was non-GM?	YES	NO	NA	
Were the animals/poultry that produced the manure/slurry fed a straight feed?	YES	NO	NA	
If <b>yes</b> to the above is a copy of the GM declaration(s) attached to this form?	YES	NO	NA	
If the manure or slurry is stored on farm prior to application, does the storage comply with the Standards and avoid the risk of pollution?	YES	NO	NA	
Please state why non-organic manure or slurry needs to be imported:				

For Office Use	Approved		Not Approved		Date	
Valid in year of issue only
